

Placenta Donation

Did you know your new gift of life could also give the gift of healing to a patient in need?

As soon as your baby is born, the placenta becomes a priceless gift with the potential to aid in healing after various types of soft tissue surgery.

Give the Gift of Healing

PLACENTA DONATION

Why Donate?

There are a variety of tissues found in the placenta that have the potential to be used as medical aids. The amniotic membrane (or amnion), which comprises the innermost layer of the placenta, is made up of a special combination of tissue which makes it a unique membrane in the human body. This membrane is comprised of cells that allow it to provide specific functions which aid in healing.

Amnion has been used for decades to promote healing after surgery. It is currently being used as an aid for a wide range of ophthalmic (eye) and dental surgical procedures, and is being developed for use in other areas including neurology and reconstructive surgery. Please consider this charitable donation so that, together, we can improve the quality of life for patients in need.

Donation Information

Any expectant mother with a planned cesarean section delivery can donate, as long as her physician is a participating member of Surgical Biologics' Placenta Donation program.

If your physician isn't a participating member and you want to donate, please contact us at **(404) 461-9265** to receive further information.

Safe The donation process poses no risk to either you or your baby. The placenta will not be recovered until after the cesarean section delivery.

Simple Once you formally consent to the donation, you are only required to answer a series of questions regarding your medical and social history. It's that simple!

Painless The donation process requires no additional surgical procedure for you. There is simply just a routine blood specimen collection, which will occur simultaneously with your admittance blood draw on the day of surgery.

Free There is absolutely no cost to you or your family for this donation.

About Surgical Biologics

Surgical Biologics is an industry leader, specializing in technologically innovative bioimplants for a variety of surgical uses.

Surgical Biologics is dedicated to ensuring the highest standard of integrity and care throughout the entire donation process. We are committed to the following:

- Seamless communication between your physician, you and your family, and the Surgical Biologics staff.
- Ensuring patient understanding and safety throughout the entire donation process.
- Pursuit and development of the latest advances in technological innovation, while maintaining an emphasis on safety and quality.
